

MANAGER'S COMMENTARY

Global indexes and the Fund both continued higher last month aided by a declining Canadian Dollar. And November made it five months in a row that the Cleantech index has outperformed the MSCI. The Greenchip Fund was up 1.6% for the month but lagged both the Cleantech and MSCI Index. Relative underperformance was partly related to Canadian dollar depreciation but also due to the market reaction to quarterly earnings reports from Cisco, Faiveley, LSB Industries and Newalta, a few of our larger holdings. At the same time the fund benefited from a surprisingly good quarter for water infrastructure company Xylem.

GREG PAYNE, PhD, CFA

Our largest Canadian holding, Boralex, announced that it had commissioned the first phase of its Seigneurie de Beupre windfarm, on time and on budget. When phase two comes online in the coming weeks, it will be Canada's largest at 270 MW.

Trading activity in the fund included adding to our position in LSB, and continuing to reduce our solar holdings.
